

## Airscrews in Theory and Experiment (Paperback)

Filesize: 9.19 MB

### Reviews

*I just started off looking at this pdf. Of course, it is perform, continue to an amazing and interesting literature. I realized this pdf from my dad and i recommended this book to understand.  
(Mrs. Ettie Berge)*

## AIRSCREWS IN THEORY AND EXPERIMENT (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 Excerpt: .Curves oP Airscrew for BE.2e. Value of (V/nD) Fig. 43. ference of body and wings are 75-5 per cent, 74-0 per cent, and 76-0 per cent respectively. At climbing speeds, the efficiency of the airscrew with the interference of the body alone is about 2 per cent lower than that of the airscrew without any interference. The efficiency at the lower values of (V/nD) is practically unaffected by the combined interference of the body and wings. We found that at a wind speed of 40 ft. per sec. the resistance of the model body alone (see Fig. 42) was 0-34 lb. At the same wind speed, the resistance of the model body with the interference of wings and struts--the wings and struts were supported in place and not attached to the body--was 0-365 lb. Hence at a wind speed of 100 ft. per sec. the resistances of a similar full-scale body alone, and also of a similar full-scale body with interference of wings and struts, would be 76-5 lb. and 82 lb. respectively. As in the previous experiments,  $(R/R_0)$  was a linear function of  $(T/pV^2D^2)$ . With no interference from the wings we found that  $(R/R_0) = 0.855 + 1.32(T/pV^2D^2)$ , where  $(T/pV^2D^2)$  is the absolute thrust coefficient of the airscrew working with the interference of the body alone. With the interference from both wings and body,  $(R/R_0) = 0.83 + 1.18(T/pV^2D^2)$ . In the latter case  $(T/pV^2D^2)$  is the absolute thrust coefficient of the airscrew working with the interference of both body...
