fluid mechanics and thermal engineering

By YU NING

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 192 Publisher: China Building Industry Press Pub. Date :2008-01. This book is divided into three units. Unit 1 is fluid. focuses on: the main physical properties of fluids. fluid statics and fluid dynamics-based foundation. fluid loss and partial loss along the way the calculation of measures to reduce flow resistance and simple lines of the hydraulic calculation. Unit 2 for engineering thermodynamics. introduces: basic concepts of engineering thermodynamics. ideal gas equation of state. the basic ideal gas thermodynamic process. the first law of thermodynamics. second law of thermodynamics. water vapor. wet air. 3 for the heat transfer unit. focuses on: the basic concepts of heat transfer. steady heat conduction. convection. radiation heat transfer and stability of the basic laws of heat transfer and basic calculation and analysis. heat exchanger heat transfer principles. the basic form. This book has the characteristics of secondary vocational education. highlight the practical. targeted. in addition to the class as a post secondary school building heating ventilation and air conditioning engineering technology and materials used in construction equipment professional. but also as in...
