RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 78 pages. Original publisher: Hampton, Va. : National Aeronautics and Space Administration, Langley Research Center ; Springfield, Va. : National Technical Information Service, distributor, 1994 OCLC Number: (OCoLC)60677341 Excerpt: . . . As part of the study, multiple tunnel runs were Angle of attack. The model angle of attack necessary with and without the flow-angle probe in is set manually by rotating the turntables to the de-place because of probe interference in the measured side pitch. This angle is determined from inclinometer readings on a reference surface attached to the wall and slot pressure data. To determine the model turntable. During the experiment, data were repeatability of the test condition, the standard deviation of the tunnel Mach number was determined acquired at 0, 0.5, 1, and 2 on all wall configurations. Data were acquired at 4 on some configurations from the same consecutive repeat runs used for the configurations. The angles were generally set to within probe analysis. The standard deviation of the free-stream Mach number was typically less than 0.0017; for free-stream Mach numbers around 0.7, the standard deviation of the free-stream Mach number is about 0.0010. Both repeatability values are considered General observations. Typical wall-pressure readings good for transonic wind tunnels. data from the 619 Tunnel experiment are shown in figure 28. The tunnel-empty (fig. 28 (a)) and Mach number calibrations. Typical tunnel-airfoil-installed (...

Reviews

The ebook is straightforward in go through preferable to recognize. It typically does not charge too much. Its been designed in an exceptionally straightforward way and it is just following i finished reading this book where basically altered me, affect the way i really believe.

-- **Dr. Reta Murphy**

It becomes an amazing pdf which i actually have at any time read through. This can be for all those who state there had not been a worthy of reading through. You wont sense monotony at anytime of your own time (that's what catalogues are for relating to should you check with me).
