RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 116 pages. Original publisher: Washington, D. C. : U. S. Dept. of Transportation, Federal Aviation Administration, Office of Aviation Research, 2004 OCLC Number: (OCLOC)62121708 Subject: Aircraft gas-turbines -- Safety measures -- Testing. Excerpt: . . . EXECUTIVE SUMMARY Modeling a multilayer fabric composite for engine containment systems during a fan blade-out event has been a challenging task. Nonlinear transient ( explicit ) finite element analysis ( FEA ) has the greatest potential of any numerical approach available to industry for analysis of these events. Significant research is still required to overcome difficulties with numerical stability, material modeling ( pre-and postfailure ), and standardizing modeling methods to achieve accurate simulation of the complex interactions between individual components during these high-speed events. The primary focus of this research was to develop the methodology for testing, modeling, and analyzing a typical fan blade-out event in a multilayer fiber fabric composite containment system. ABAQUS finite element code was used to verify the basic material model ( prefailure state ) developed through laboratory testing. LS-DYNA was the primary modeling tool used in the explicit FEA of ballistic events. During the Fourth Federal Aviation Administration ( FAA ) Uncontained Engine Debris Characterization Modeling and Mitigation Workshop ( held in May 2000 at SRI International, Menlo Park, CA ), a representative of Honeywell Engines, Systems and Services presented the capability of modeling complicated engine hub-burst and fan blade-out events, predicting most of the event with high confidence was shown. At the same time, SRI presented their efforts on modeling the material characteristics within LS-DYNA and developing a new composite fiber material called Zylon that appeared to be stronger, lighter, and more temperature-resistant than Kevlar. Both parties showed interest in each others work, and both agreed...
