## DETERMINANTS OF FOREIGN DIRECT INVESTMENT IN TRANSITION ECONOMIES

LAP Lambert Academic Publishing Mai 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x5 mm. This item is printed on demand - Print on Demand Neuware - Using a panel dataset of bilateral flows of foreign direct investment (FDI), we study the determinants of FDI in transition economies, with particular reference to Macedonia's performance. Even though Macedonia has been introducing extensive fiscal and business sector reforms, so far it has been lagged in attracting foreign investment. Following the empirical approach used in previous studies and the theoretical discussion presented in Chapters 2 this study specifies both static and dynamic models. The static models, both fixed and random effects, do not give the best specification. The empirical work confirms the expectation of the positive feedback effect of past FDI onto current FDI. The negative and significant coefficient of distance indicates that FDI is determined by gravity factors. In addition, GDP of the host country, unit labour costs, trade openness, English language are also important determinants of FDI in transition economies. Our suggestion is that the econometric findings on the determinants of FDI in transition economies using small dataset and static models should be accepted only with caution. 88 pp. Englisch.
